

The South Florida AGC's
*2nd Wednesday
Safety Session*

This month's topic

Experience Modification Rate: Approaching It Strategically

Presented by Chris Murphy, Vice President Enterprise Loss Control at Holmes Murphy & Associates and Brandon Beane, Vice President of Risk Management, at Coastal Construction.

Workers' compensation insurance is one of the most expensive components of a business insurance program. If you've noticed a steady climb in the cost of your company's workers compensation costs over the past few years, chances are you either have an injury frequency or an injury severity problem. **Learn how your entire team can help lower your Experience Modification Rate, protect your bottom-line and ultimately pay less in insurance premiums.**

Chris Murphy is Vice President, Enterprise Loss Control at Holmes Murphy & Associates in Waukee, Iowa and has more than 18 years' experience in loss control with several property/casualty insurance carriers and brokers. In his role, he leads Holmes Murphy's team of loss control consultants and provides safety and risk management services to large clients across a variety of industries.

A member of the construction industry for more than 20 years, Brandon oversees Coastal's risk management, and insurance programs to assure broad and cost-effective coverage across all operations, and on a project-by-project basis. In addition to his role at Coastal, Brandon serves as First Vice President of the South Florida AGC and is a Partner with NHG Specialty, a retail insurance brokerage exclusively serving the construction industry.
